Cape Canaveral, FL 32920

Dear Ms. Longo,

This September 10-11, 2014, AFTAC hosted its first Women in Science and Engineering Symposium with the goal of creating a more inclusive environment in Science, Technology, Engineering, and Mathematics (STEM) fields. We discussed the importance of Women in Science and Engineering and demonstrated the value of creating and sustaining a diverse workforce. Over 242 total participants were encouraged at this two day event held at both AFTAC and DEOMI on Patrick AFB.

Because of speakers like you, our participants gave this event an impressive 90% overall satisfaction rating, with some of our speakers receiving a 95% rating in appreciation for their motivating and engaging presentations. Your individual ratings and feedback comments are attached for your review. Bottom line: This event was possible because of your support. We thank you for sharing your expertise and passion with other STEM professionals.

Please allow this note to convey our sincerest appreciation for your support to AFTAC and our STEM professionals. We do hope we may continue to call upon you for your support for future events. Thank you again!

Respectfully,

A handwritten signature in blue ink, reading "S J D McNabb".

SUZANNA J.D. MCNABB, PhD, Lt Col, USAF,
Deputy, Directorate of Plans and Programs
